

Are you looking for a hands-on educational experience that focuses on science and the environment?

The Agricultural and Environmental Sciences Program

The Agricultural and Environmental Sciences Program is integrating a new portion of the National CASE (Curriculum for Agricultural Science Education) model. Natural Resources and Ecology will become a part of the curriculum in September 2013, joining Introduction to Agriculture, Food, and Natural Resources and Principles of Agricultural Science – Plants.

This shared-time program provides a strong foundation for college-bound students who are interested in the environmental sciences.

TOPICS COVERED INCLUDE:

Conservation versus Preservation
Ecosystems
Energy
Fisheries
Geospatial Technology
Global Natural Resources Issues
Human Impact on Natural Resources
Invasive Species
Social Concerns
Sustainability
Water Conservation and Quality
Wildlife Management

Students:

- Can receive 7 college credits at Mercer County Community College (additional articulation agreements pending)
- Earn appropriate science credit to meet NJ high school graduation requirements
- Explore career and post-secondary opportunities in each area of the course.
- Learn from a Nationally Certified CASE (Curriculum for Agriculture Science) instructor

Interested students may visit this program March 18-21. Please see your guidance counselor for details!
