

ANNUAL NOTIFICATION REQUIRED BY AHERA

“Asbestos Hazard Emergency Response Act, AHERA 40 CFR 763, requires all schools from Pre-K to Grade 12 to conduct inspections to determine if they contain asbestos containing building materials (ACBM).” If they do, the ACBM must be categorized according to type of material, locations, current damage, and potential for future damage and a detailed Asbestos Management Plan must be developed. The Management Plan details the inspection findings and outlines the response actions the School Board intends to implement.

To accomplish these goals, the School Board has on file at each school in the District Office a New Jersey State Department of Health Approved Asbestos Management Plan for all school facilities. The provisions of the plan are being implemented in a timely and ongoing fashion. It is the desire of your School Board to provide a safe and healthy facility for all students, employees and visitors.

The purpose of this correspondence is to satisfy AHERA requirements for written notice of the availability of the Management Plan for review. Should you desire, please contact me for further details.

\* \* \* \* \*

The Ocean County Vocational Technical School’s Asbestos Management Plan and (3) three year updates to the plan are maintained and are available for inspection at the following locations which contain *Asbestos Containing Materials*:

- Brick – 350 Chambers Bridge Road, Brick
